

Respond from the road with Mobile Map!

Mobile Map is an emergency display software that can be easily installed on any mobile emergency vehicle's computer or on your smart phone as an app (internet access not included) that will display call routes from GPS from your location to any incident location.

Mobile Map can also help you locate fire hydrants, waterlines, district boundaries, hospitals, emergency centers, SARA facilities, and many other important locations that are critical in reducing your responding time to any emergency situation.

Available for
iPad, Windows 7,
and is currently
being developed
for Android
