

Station Manager™

The Ultimate tool in Station Management

Station Manager is a complete management tool for your fire department, EMS or any other emergency station. Station Manager displays incident call information including incident location, turn-by-turn directions, incident running time plus other features such as personnel tracking, apparatus tracking, incident tracking, member information, member status and credential labeling, emergency and calendar notes (with time-to-live), incident photo accessing and local and area weather. It is the Total Station Management System!

Local Weather, Emergency Notes and Calendar Events

Current Incident with Responding Members and Apparatus

Editing a Current Incident before Closing
